Overalls Our Services: Inbound -> Outbound Logistics

Overalls Our Services: Shuttle Trucks

Example : Truck Transportation Services : Shuttle between WH <-> WH [MST]

Overalls Our Services: Import & Export

1) Import Process

Import & Export Container Transportation – Operational Flow

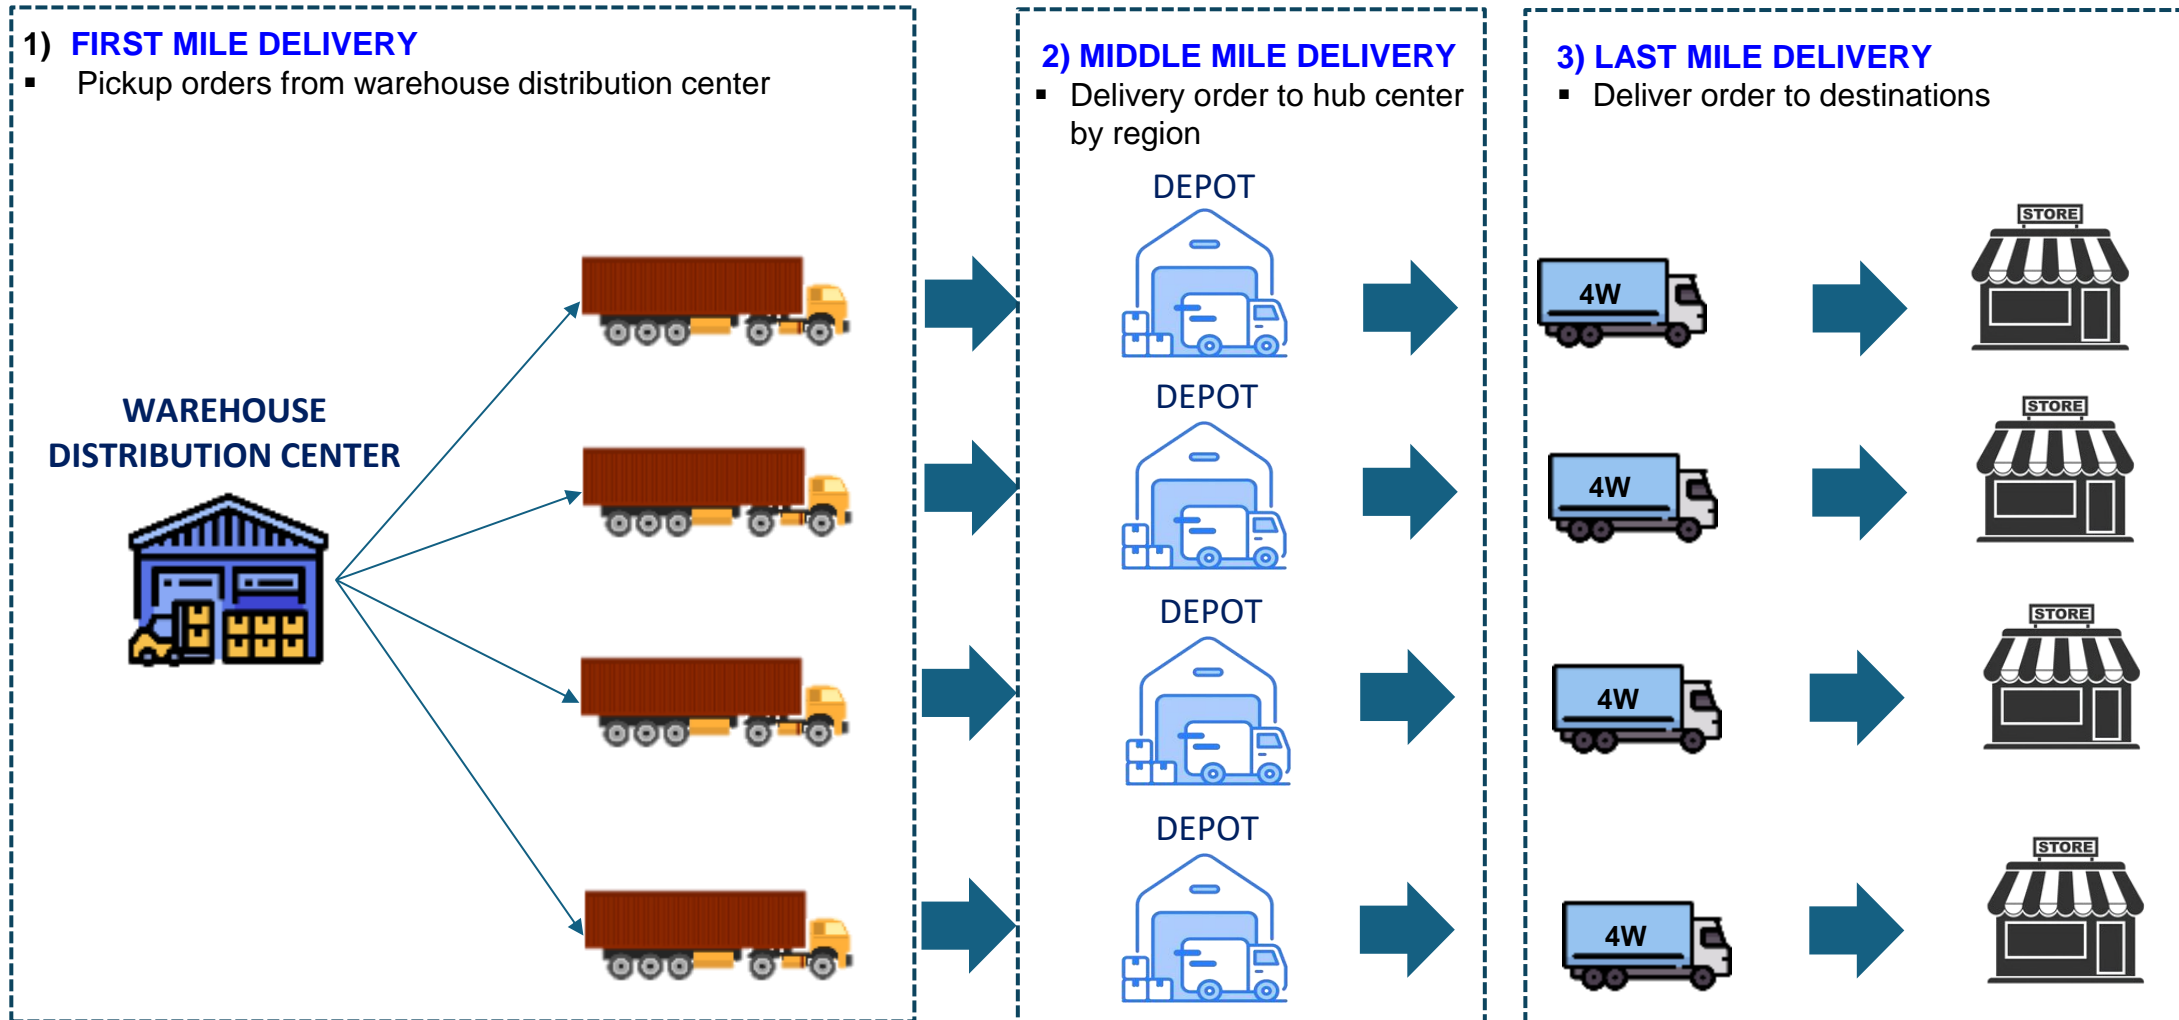

- **Job Order Confirmation:** Receive and verify shipment details (import/export, container size/type, pickup & delivery points), schedule, vessel info, and required documents.
- **Document Preparation:** Prepare key documents (Import: D/O, B/L, customs clearance; Export: booking confirmation, export declaration, shipping instruction) plus truck permit and port entry papers.
- **Truck & Driver Arrangement:** Assign a suitable truck/trailer, arrange a qualified driver with valid licenses and port access, and inspect vehicle condition.
- **Container Pickup:** Import—collect container from port/yard after document check; Export—pick up empty container from depot and inspect condition.
- **Transportation:** Deliver container to destination following planned route and safety rules; report delays or issues to operations.
- **Loading/Unloading:** Import—unload at customer site; Export—load at shipper site, secure cargo, and seal container correctly.
- **Container Return:** Import—return empty container to depot; Export—deliver loaded container to port and complete gate-in/gate-out.
- **Completion & Documentation:** Collect signed proof (Delivery Note/EIR), submit documents to operations/accounting, and close the job in the system.
- **Safety & Compliance:** Follow traffic and port regulations, protect cargo/container integrity, and report incidents immediately.

2) Export Process

Overalls Our Services: Nationwide Distribution

Example : Truck Transportation Services : Nationwide Distribution Process

Contingency Plan for TNB's Transportation

1. Identify Critical Transportation Needs [ระบุความต้องการสำคัญ]

Define the purpose: Is this for commuting, logistics, business operations, or personal emergencies?

List key routes: Identify the main transportation routes and methods.

Determine priorities: Focus on essential trips (e.g., work, school, deliveries).

2. Assess Potential Risks [ประเมินความเสี่ยง]

Natural disasters: Floods, hurricanes, snowstorms, earthquakes.

Technical failures: Vehicle breakdowns, public transit outages, fuel shortages.

Human factors: Strikes, driver unavailability, or accidents.

External issues: Road closures, construction, or pandemics.

3. Develop Alternative Transportation Options [เตรียมทางเลือกสำรอง]

Primary backups: Public transit: Truck

Emergency vehicles: Private transport providers.

Remote work/online options: Eliminate the need for travel when possible.

Contingency Plan for TNB's Transportation

4. Prepare Resources [เตรียมทรัพยากร]

Personal transportation: Keep vehicles maintained (spare tires, fuel, emergency kits). Maintain public transit passes or apps.

For businesses: Contract backup transportation providers. Maintain fleet backups (extra vehicles, drivers).

5. Create a Communication Plan [สร้างแผนการสื่อสาร]

Contact list: Maintain a list of key contacts for transport providers, emergency services, or coworkers.

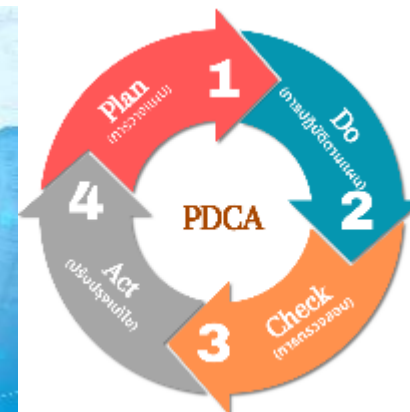

Notification tools: Use apps or alert systems to stay updated on traffic, road conditions, or public transit disruptions. Inform stakeholders (e.g., customers, team members) about delays.

6. Test and Update the Plan [ทดสอบและปรับปรุงแผน]

Practice drills: Test alternative routes and methods.

Update regularly: Revise the plan based on seasonal changes, new risks, or evolving needs.

Feedback loop: Gather Line from everyone involved to refine the plan.
